Funding for cattle EST sequencing was provided by the USDA National Research Initiative, Animal Genome Resource Grant AG 99-3205-8534 to H. A. Lewin and J. E. Womack. Base Calling/Quality Scores: PHRED from Washington University Genome Center. Vector Trimmi g: Cross match from Washington University Genome Center PHRAP suite. This sequence is vector free and at least 200 bp in length.
                                                                                                                                                                                                                                                                                                               FORWARD: TAATACGACTCACTATAGGG

Patent No. 6498022

GENERAL INFORMATION:

APPLICANT: WEI, Ming-Hui et al

TITLE OF INVENTION: ISOLATED HUMAN TRANSPORTER PROTEINS,

TITLE OF INVENTION: NUCLEIC ACID MOLECULES ENCODING HUMAN TRANSPORTER PROTEINS,

TITLE OF INVENTION: AND USES THEREOF

FILE REFERENCE: CL001018

CURRENT APPLICATION NUMBER: US/09/734,674

CURRENT FILING DATE: 2000-12-13
                                                                                                                                                                                                                                                                                                                                                    NUMBER OF SEQ ID NOS: 4

ova

The present invention is concerned with methods of using C. elegans identify compounds which are capable of up- and down-regulating the activity of the sarco/endoplasmic reticulum calcium ATPase (SERCA). protein is involved in cell signalling, and elevated levels affect cellular processes such as contraction, secretion and cell cycling.
